

Internship opportunities 2017-2018

The department has an MA internship program whose purpose is to give MA students an opportunity to gain some experience in their areas of expertise. This would increase the students' competitiveness in the job market or further advanced study.

The internship program normally lasts from 5 to 6 weeks. The intern is to maintain a weekly journal for the activity and will be assessed by a supervisor at the host institution. The list of our partner institutions is given below.

To participate in the internship program, you will need to enroll in LT5199 Professional Internship offered in the summer term. It carries 3 credits and can be applied toward the credit requirement for graduation.

If you are interested in the internship program, you need to apply by Nov 22, 2017. Please send us a statement indicating the institution for which you wish to be an intern, the reason for your interest in the position, and the latest transcript from City University of Hong Kong or your last place of study. We will interview the applicants shortly afterwards and make arrangement with the host institution accordingly. You should know the status of your application before the last add/drop date of Jan 22, 2018 for Sem B 2017/2018.

Internship host institutions
